

# LIZTOR

## RACING PARTS

### LIZTOR Racing Selector:

AUTHENTIK RACING TEAM is a French racing team who make Vespa races in Europe since 2007, with a lot of podium and victory on sprint and endurance races.

Based on all this race experience, AUTHENTIK RACING TEAM develops some racing parts called LIZTOR RACING for Vespa scooter.

The LIZTOR selector for Vespa PX allows a bigger angle on right turns in comparison to the original selector boxes of the Vespa PX motors (and most of largeframe).

The design allows you to lean further into corners than ever before!

The CNC parts and the possible adjustments provide a more solid and precise gear selection.

#### Main characteristics:

- Aluminum CNC parts, black anodized
- Bigger angle on right hand turn
- Plug and play device (no modifications required)
- Anti-crash protection: massive aluminum plate of 13mm
- Adjustment of selection position of +/-1,5mm for more gear selection precision
- Adjustment of spring stiffness ore gear selection precision
- Fit on following model: Vespa P150S 2°, /PX80-200 E Lusso 2°/'98/MY, T5
